CAREER OBJECTIVE

Motivated Computer Science and Engineering graduate (2026) from UBDTCE Davangere with hands-on experience in Python, Web Development, and SQL. Seeking an entry-level software developer role to apply skills in building scalable web applications and innovative software solutions.

EDUCATION

B.E. in Computer Science and Engineering | UBDTCE, Davangere | 2022 – 2026

CGPA: 7.63

Pre-University Certificate (PUC) – Science | Vishwa Chetana Vidyaniketana, Davangere | 2020 – 2022

Percentage: 96.33%

SSLC (10th Standard) | Adarsha Vidyalaya, Hagaribommanahalli | Passed 2020

Percentage: 90.88%

INTERNSHIP EXPERIENCE

Python Full Stack Development Intern | QSpiders (Test Yantra Software Solutions Pvt. Ltd.), Bengaluru Rajajinagar, Bengaluru, Karnataka | Jan 2026 – May 2026

- Gained hands-on experience in Python Full Stack Development through real-world projects.
- Developed practical skills in building web applications using Python, HTML, CSS, and Django.
- Worked in a collaborative team environment, reporting to a senior mentor throughout the internship.
- Gained industry exposure and insights into software development practices in the IT industry.

TECHNICAL SKILLS

Programming Languages: Python, SQL

Web Development: HTML, CSS, Bootstrap, Tailwind CSS

Soft Skills: Problem Solving, Teamwork, Communication, Analytical Thinking

PROJECTS

Pneumonia Disease Detection using Deep Learning | *Technologies: Python, Deep Learning, CNN, HTML, CSS, Django*

- Built a Convolutional Neural Network (CNN) model to detect pneumonia from chest X-ray images with high accuracy.
- Developed a full-stack web interface using HTML, CSS, and Django for real-time image upload and diagnosis.
- Performed image preprocessing and data augmentation to improve model performance.
- Achieved significant accuracy in binary classification of Normal vs Pneumonia X-ray images.

EcoEats – Voice Assistant Food Ordering Web Application | *Technologies: Python, React, HTML, CSS, Django, MySQL*

- Developed a full-stack food ordering web application integrated with a voice assistant for hands-free ordering.
- Built the frontend using React, HTML, and CSS for a responsive and interactive user interface.
- Implemented backend using Python and Django with MySQL database for managing orders and menu data.
- Integrated voice recognition functionality allowing users to place food orders using voice commands.

CERTIFICATIONS

Data Structures and Algorithms using Java | NPTEL (National Programme on Technology Enhanced Learning), IIT
